## Have your UNI-DAMP Hygro Box reviewed

Uni-Damp has made hygro Boxes to badminton clubs for more than 25 years, and many of the very old ones are still in use. To help our customers ensure the optimal storage of their badminton shuttles, we do a international service round.

### The service includes:

- Cleaning of the box
- Impregnation
- Evaporator test
- Test of electronics
- Steam level calibration

The price is €59 plus transport depending on the country where the cabinet is located (ex. WAT)(possible spare parts and salary for larger repairs are not included). In connection with the service visit, a 15% discount is given on existing spare part prices, which of course also exclude shipping etc.(Subsequent lockers at the same address cost € 39)

### The following is required:

- Access to locker for a pre-specified time interval
- Access to water and drainage
- Possible contact to the person in charge regarding possible replacement of components

**Call or write to us if you have any questions or order a service review**
